

Ross Chiropractic Center LLC

Dear Patient:

As part of your treatment at Ross Chiropractic, your doctor may recommend the use of electrical muscle stimulation (EMS) as part of your treatment plan. This type of therapy requires the use of adhesive pads that are attached to your injured body part. For your safety and protection you will be given your own set of pads to use each time you receive treatment. These pads will be kept in your file and are used exclusively for you. The cost of these pads is \$11.00, which is a non-covered expense to you.

Thanks!
